
■ Questions (for DP notes)

Q1: Famous Quote 2

Repeat Exercise 4, but this time store the famous person's name in a variable called `famous_person`. Then compose your message and store it in a new variable called `message`. Finally, print your message.

Q2: Stripping Names

Store a person's name in a variable, and include some whitespace characters at the beginning and end of the name. Make sure to use both `"\t"` (tab) and `"\n"` (new line) at least once.

- Print the name once, so the whitespace around the name is displayed.
 - Then print the name after stripping the whitespace (using a method like `trim()`).
-

Q3: Number Eight

Write addition, subtraction, multiplication, and division operations that each result in the number 8.

- Enclose each operation in a `print` (or `console.log`) statement so that the results are displayed.
- You should create four lines that look like this:
- `console.log(5 + 3)`

Your output should simply be four lines with the number **8** appearing once on each line.

Q4: Favorite Number

Store your favorite number in a variable. Then, using that variable, create a message that reveals your favorite number. Print that message.
