

1. Install Node.js, TypeScript and VS Code on your computer.

2. **Question:**

☞ Store a person's name in a variable, and print a message to that person. Your message should be simple, such as, "Hello Eric, would you like to learn some TypeScript today?"

3. **Question:**

☞ Store a person's name in a variable, and then print that person's name in lowercase, uppercase, and titlecase.

Lowercase: haroon rasheed

Uppercase: HAROON RASHEED

Titlecase: Haroon Rasheed

4. **Question:**

Question:

☞ Find a quote from a famous person you admire. Print the quote and the name of its author. Your output should look something like the following, including the quotation marks:

Example:

"With faith, discipline and selfless devotion to duty, there is nothing worthwhile that you cannot achieve." – Quaid-e-Azam Muhammad Ali Jinnah
